Profile

Summary of work experience / key sectors e.g. I have been working in the WASH HGO sector for 6 years at national level, 4 as a WASH advisor and the past 2 years as a WASH Project Manager. A qualified civil engineer I have focused on hard skill WASH aspects however more recently I have developed a real interest in soft skill community participatory approaches such as PHAST and CLTS.

2 / 3 Transferable competencies / skills gained (useful for your next position) from the above experience useful for target job sought e.g. Having worked as both an advisor and project manager I have learnt how to use and include different team member backgrounds and capacities to deliver quality work to budget and on time.

What I am doing now (do not assume knowledge on your location / context) e.g. Based in my home country Haiti I am managing a team of 6 drillers in the remote and barren island of La Gonave.

My objective now (What post, where and why) e.g. I am now seeking my first international assignment ideally with Concern in an African francophone country to gain exposure to new contexts and learn new solutions to a fresh set of programme challenges.

Work Experience

Company Name: Job Title: Dates Worked

Key Duties: *Listed in achievement form* e.g. After 4 years as an advisor I was responsible for the successful completion of 120 boreholes (75% are still in use), servicing both rural and peri-urban communities. I also delivered hygiene promotion workshops in community settings to reinforce key behaviour change messages identified in the programme design. This work as a trainer contributed significantly to the Concern results based framework.

Gaps addressed where possible Example 1. Between 2008 and 2010 I was unemployed due to a coup d'état and resulting economic instability.. Example 2. From 2006 to 2009 I took care of a family member who was seriously ill. During this period I developed professional care of the elderly skills engaging with and learning from community health workers (as appropriate). I believe this personal experience has reinforced my conviction to work with the most vulnerable in communities.

Progression signposting where possible Example 1. Having successfully filled in for my team leader who was ill for 2 months I was then given assistant project manager responsibility. Example 2. Job Title: WASH Project Manager (promotion). Example 3. (Additional new duties not gained in previous similar roles) My current WASH Project Manager has given me the opportunity to develop my people development skills, budget management planning, project design and effective narrative donor report writing documentation.
